

Cane Plunger ROD

OLD TECHNOLOGY

Builds up pressure of water which forces obstruction clear.

- Used to build up water pressure in pipes and flush through any blockages that may have occurred
- Main uses: Unblocking main stacks, floor drains, vents and outside downspout drain stock
- These traditional rods use the best quality imported cane that is carefully selected for uniformity and consistency
- It is assembled with high quality solid brass joints that are securely fitted to the rods with brass rivets
