

FLOW CLEAN System Descaler Kit

LynCar's FLOW CLEAN System Descaler Kit works with isolation valves that provide 3/4" hot and cold service connections. This kit has been specifically designed to improve flow / heating efficiency to tankless water heaters by aggressively dissolving lime, water scale and rust deposits in the appliance.

The FLOW CLEAN descaler kit contains:

- 1 3.5 Gallon bucket
- 1 350GPH pump
- 2 5 foot rubber hoses
- 1 1 litre jug of FLOW CLEAN

Recommended commercial applications: every 3 months

Recommended residential applications: Once a year as needed

Part#	Description
15152	FLOW CLEAN System Descaler kit

FLOW CLEAN 1 litre jug

FLOW-CLEAN Descaler dissolves water scale, lime, rust and other deposits in tankless water heaters. It is eco-friendly, non corrosive, non toxic, biodegradable and has zero VOC. In addition to tankless water heaters, this product can be used in ice machines, boilers, chillers and exchangers.

The Descaler solution is biodegradable with a BOD value of 16mg/l. This normally allows the solution to be water flushed down sewers. Check regulations in your area prior to disposal.
