

TECHNICAL INFORMATION

PUSH N' CONNECT

Waterline's Pushn'Connect system of lead free fittings and valves are designed to make plumbing connections easier and faster than ever before. Available in sizes 1/2" through 1", ideal for use on plumbing, water heaters and hydronic heating systems. Designed and approved for use in walls with or without access panels, and underground. Repairs to wet systems are no sweat, the connection can be made simply without having to wait for pipes to dry.
